

MIRAGE - M I Reporting AGregating Engine

Overview

The concept behind MIRAGE is to design and aggregating engine that consolidates and maintains a typical data warehouse that includes various business lines and provides comprehensive MIS reports for the management at organization level. Although the base framework of mirage is common and can serve for building any business intelligence application, MIRAGE is more customized for Wealth Management Company specific requirements and to take care of their needs.

Core Modules

- Master Maintenance
- Input Interfaces
- Output Interfaces
- Reports
- Dynamic Analysis Reports using Microsoft Analysis Services (MSAS)
- Mirage Administration Console

Unique features

Comprehensive Integration

- Centralized data storage system that provides for faster access and integrity
- Extremely user – friendly interface
- Pre-requisite user defined rights at diversified levels
- Generates dynamic as well as standard reports
- Defined interfaces to various input and output system.

Well – equipped Technology

- Developed using .NET and SQL Server 2005
- Ensures scalability, interoperability, data integrity, easy maintenance and reliability.

User – friendly GUI

- The advantageous GUI makes the operations intuitive, easy to learn and use.
- Provides immediate visual feedback about the effect of every action than typing seemingly arcane commands to accomplish the same.

Key Benefits

Query & Analysis capabilities

- MIRAGE : provides multiple query interfaces, enabling users to access and query data on their own without having to learn new skills. All levels of users can access and produce reports
- FAST : MIRAGE provides fast access to information, reports and analysis so that users have the information they need to make informed decisions.
- SIMPLE: MIRAGE offers capabilities appropriate for users with different skill sets at all levels of the organization. It provides the information in familiar, easy-to-consume formats.
- COMPLETE: MIRAGE presents a comprehensive, fully integrated platform that addresses users' needs across the organization. This makes it easier to share a consistent, holistic view of the business and enhances decision – making abilities.

More than history

Other vendors provide business intelligence solely in the form of historical reports that provide hindsight but limited insight. MIRAGE provides data integration and reports that helps you understand the past, monitor the present and predict outcomes as you move your business ahead.
